Master of Sciences Program Agribusiness

Behave Ethically, Think Analytically,
Act Strategically

DEPARTMENT OF AGRIBUSINESS
FACULTY OF ECONOMICS AND MANAGEMENT
BOGOR AGRICULTURAL UNIVERSITY

PROGRAM OVERVIEW

Starting in 2010, Department of Agribusiness, Faculty of Economics and Management, Bogor Agricultural University has been offering a Master of Sciences (M.Sc. equivalent) program awarding Master of Sciences in Agribusiness (M.Si-AGB) title to successful student. The program is called S2-AGB.

Tropical agribusiness is a business on food and fiber produced by agriculture, fisheries, animal husbandry, forestry and the plantation, as well as eco/agro-tourism sectors run by rural households and modern corporations in tropical regions, typically Indonesia. Background of the establishment of S2-AGB is the fact that agribusiness, mainly tropical agribusiness is unique in nature. It needs therefore a specific level of know-how and skills to solve.

It is unique because it deals with agricultural product that is produced on risky and volatile circumstances. No mention to the fact that agribusiness deals with food as well, with all issues concerning security, safety and nutritional aspects at national, regional and global scopes. Especially in tropical regions, agribusiness is characterized by following natures: (1) it is double faces in the sense that it is run by myriads of small scale households and modern large scale corporate with extreme differences; (2) agribusiness faces new horizon of culture technique as a result of genetic engineering development to microorganism that changes the input structure of production process; (3) the need of innovative governance along the value chain of agribusiness commodities to bring fairness among the playing agents; (4) the increasing need of bio-fuels as alternative to fossil energy has opened wide opportunity to tropical agribusiness sectors.

The S2-AGB offers a knowledge based competence enabling the graduate to deliver public policy and efficient business decision. In particular, S2-AGB coursework focuses on enhancing specific know-how and skills required to make effective agribusiness policy as well as agribusiness decisions within the context of the food and fiber business, from input suppliers through primary producers to wholesalers, processors, retailers in a competitive and consumer-directed market.

VISION

The S2-AGB program is established to become a leading graduate program in Indonesia, and the world, in delivering a whole and sustainable concept of agribusiness to promote human welfare.

MISSION

The S2-AGB program is established to deliver the following services:

1. To conduct agribusiness teaching in competitive and sustainable atmosphere.
2. To conduct/and initiate research to support the development of bio-business and entrepreneurship sciences for competitive and sustainable agribusiness

OBJECTIVE

Educational objectives of S2-AGB program are described as follows:

1. To equip the graduates with business knowledge, skill, and moral that enable them to become an effective and qualified human resource for competitive, ethical and sustainable agribusiness.
2. To provide a medium for the development of approaches and methods, models and techniques for problem solving of competitive and sustainable agribusiness.
3. To pursue professional partnership with business and government agencies in the areas of training/education and research and to deliver a business development model(s) for competitive and sustainable agribusiness.
4. To enable the graduates of becoming a high quality human resources in problem analysis, policy formulation and business development of competitive and sustainable agribusiness.

COMPETENCE

The competence of S2-AGB graduates is the capability of analyzing issues and synthesizing knowledge and skill, in order to formulate knowledge based public policy and business decision for a competitive and sustainable agribusiness.
